Master in Data Science & Business

👤 PROFIL

Currently in my **final year of a Data Science Bachelor's program** and completing my **second year in a work-study** program, I am seeking a master's degree to further develop my **overall data skills** while contributing to impactful projects.

🎓 EDUCATION

2022 - 2025
IUT Paris Rives de Seine, 75016 — BUT Science de Données (SD/Ex-STID)

2019 - 2022
Lycée d'Arsonval, 94100 — Baccalauréat Général (SES + Mathématiques) Mention Bien

📝 UNIVERSITY PROJECTS

December 2023 - January 2024
Data Integration Project at NIL
Developed a data warehouse and relational modeling to analyze user behavior and sales performance. Designed **efficient data flows using SQL** and transformed **raw data into actionable insights** to support **decision-making processes.**

April 2023 - June 2023
World Happiness Analysis Project
Conducted an analysis of the World Happiness Report data using RStudio to identify key factors influencing global well-being. Highlighted **correlations between economic, social, and perception indicators** to provide actionable insights on happiness trends.

💼 PROFESSIONAL WORK EXPERIENCE

Currently - September 2023
ADP France (Automatic Data Processing)
Data Scientist & BI Developer

- **Designed and optimized Power BI dashboard**s for KPI analysis and reporting.
- **Developed and managed dataflows** with complex calculations using **DAX and Power Query.**
- Built a **scorecard system** to track performance and support **data-driven decisions.**
- Enhanced **dashboard accessibility** and tailored **visualizations for user needs.**
- **Collaborated with managers** to deliver **actionable insights efficiently**.
